Attention: Imported Water Committee

Adopt Delta Policy Principles. (Action)

Staff recommendation

Adopt Delta Policy Principles to guide staff in evaluating Bay-Delta initiatives and the Water Authority's advocacy to ensure a successful implementation of a Delta solution.

Alternatives

1. Modify one or more draft principles.
2. Do not adopt Delta Policy Principles.

Fiscal impact

None.

Background

The Sacramento-San Joaquin Bay Delta is an important water supply source for Southern California. Metropolitan Water District (MWD) purchases water from the Department of Water Resources through its State Water Project (SWP) contract. MWD is the SWP's largest customer, providing more than 50 percent of its revenues. As such, MWD is the principle source of revenue under the current SWP as it will be for any proposed Bay Delta solution. As the largest steady purchaser of MWD water, the Water Authority has a vital interest in assuring that any Bay Delta solution is financially sustainable. The Water Authority has advocated for a number of changes in the MWD rate structure, including securing take-or-pay contracts with its member agencies or other firm commitments to pay the fixed costs of a Delta conveyance project.

Discussion

The Water Authority has been a strong advocate for a sustainable Bay Delta solution. The Water Authority actively engages in Bay Delta issues at the MWD board and other forums including the State Capitol, where it lobbied for passage of the 2009 comprehensive Bay Delta bill package. The 2009 bill package approved as state policy the co-equal status of restoring the Delta ecosystem and creating a more reliable water supply for California. Recently, the Water Authority held two Bay-Delta workshops receiving input from stakeholders on their views of the issues and a Bay Delta solution. The Water Authority also participates directly on three Bay Delta Conservation Plan (BDCP) working groups on Conveyance, Governance and Finance.

The Water Authority has consistently advocated for a "right-size" solution in the Delta that is also supported by a broad range of stakeholders in order to reduce challenges to implementation. A central point of the Water Authority's advocacy position in determining the "right size" of a Bay

Delta solution is clear commitments to pay through take-or-pay contracts or legal equivalent to pay the fixed costs of a project.

The Delta Policy Principles will help guide staff as they evaluate the BDCP and other projects and actions relating to the Bay Delta solution. Draft principles were presented to this committee for review last month; the attached recommended principles reflect comments received on the prior draft.

Attachment: Delta Policy Principles

San Diego County Water Authority Delta Policy Principles

The San Diego County Water Authority Board of Directors supports a Bay Delta solution that will meet the co-equal goals and provide San Diego County with a reliable, high-quality supply of affordable, imported water consistent with the Water Authority's Urban Water Management Plan and Regional Facilities Optimization and Master Plan. The adopted policy principles will guide staff in evaluating projects and actions concerning the Bay-Delta.

Water Supply Reliability

- Continue to support the co-equal goals of water supply reliability and environmental restoration embodied in the 2009 Delta bill package.
- Support deliberative processes that are designed to ensure a meaningful dialogue with all stakeholders in order to reduce future conflicts and challenges to implementation of a Bay Delta solution.
- Provide regulatory certainty and predictable supplies to help meet California's water needs in the long-term.
- Encourage a Bay Delta solution that acknowledges, integrates and supports the development of water resources at the local level including water use efficiency, seawater and brackish water desalination, groundwater storage and conjunctive use, and recycled water including direct and indirect potable reuse.
- Improve the ability of water-users to divert water from the Delta during wet periods, when impacts on fish and ecosystem are lower and water quality is higher.
- Encourage the development of a statewide water transfer market that will improve water management.
- Support improved coordination of Central Valley Project and State Water Project (SWP) operations.

Ecosystem Restoration

- Restore the Bay-Delta ecosystem consistent with the requirements established under the state Natural Community Conservation Plan and the federal Habitat Conservation Plan, taking into account all factors that have degraded Bay-Delta habitat and wildlife.
- Work with all stakeholders to ensure a meaningful dialogue and that ecosystem restoration issues are addressed in an open and transparent process.

Finance and Funding

- Encourage and support a Bay Delta solution and facilities that are cost-effective when compared with other water supply development options for meeting Southern California's water needs.
- Require the total cost of any Bay Delta solution be identified before financing and funding decisions are made. The total cost must include the cost of facilities, mitigation and required or negotiated ecosystem restoration.
- Allocate costs of the Bay-Delta solution to stakeholders in proportion to benefits they receive.

- Seek and support independent financial analyses of Bay-Delta solution including the ability of all parties to pay their proportional costs.
- Require a firm commitment and funding stream by all parties to pay for the fixed costs associated with the proportional benefits they will receive from a Bay Delta solution, through take-or-pay contracts or legal equivalent.
- Condition financial support on provisions allowing access to any water conveyance or storage facilities that are included in the Bay Delta solution.
- Support the use of public funds to support specific projects and actions with identified costs that protect and restore the environment and provide broad-based public benefits.
- Oppose water user fees to fund ecosystem restoration and other public purpose, non-water-supply improvements in the Delta that benefit the public at large.

Facilities

- Require independent technical analysis of proposed key elements of the Bay-Delta solution, including forecasting future urban and agricultural demands and size and cost of any proposed conveyance facility, to ensure the solution realistically matches statewide needs.
- Support “right-sized” facilities to match firm commitments to pay for the Bay Delta solution.
- Allow access to all SWP facilities to facilitate water transfers.

Governance

- Support continued state ownership and operation of the SWP as a public resource.
- Support improved efficiency and transparency of all SWP operations.
- Oppose any transfer of operational control of the SWP or any of its facilities to MWD, the State Water Project Contractors, Central Valley Project Contractors, the State and Federal Contractors Water Agency, any entity comprised of MWD or other water project contractors, or any other special interest group.
